**SECOND SESSION OF THE
GLOBAL IFA TAX DIRECTORS WEBINAR SERIES**

CURRENT INTERNATIONAL TAX ISSUES FOR TAX DIRECTORS

Challenges of Global Megatrends: Mobility, Data, and Global Trade

Speaker details will follow soon

This webinar will once again bring together Tax Directors from large multinational companies across different industries to discuss key international tax issues relevant to their roles. The discussion will focus on global megatrends shaping today's tax landscape, including risk management in an environment of increased global mobility, the valuation and taxation of data in the context of growing reliance on AI, and the management of risk and compliance complexity in custom policies and global trade. In addition to providing a platform for the exchange of knowledge and experience, this webinar will pave the way for the Tax Directors' Lunch Dialogue, which will take place during the IFA 2026 Melbourne Congress, where the most prominent issues identified during the webinar will be debated by Tax Directors and other key stakeholders.
